

International Frequency coordinator for EMEA

2 years extendable

(ASAP)

BACKGROUND

Kosmas GEORING Services has developed a system for On-Orbit Servicing that can extend the lifetime of existing satellites on orbit ^[1] However, in numerous cases the satellites need to be relocated to serve other orbital slots as their owner has planned already for a replacement. There is therefore a need to identify the optimal replacement strategy.

TASKS

- Perform technical and administrative tasks related to Frequency coordination for satellites in Ku and C band at 0° East to 40° East longitude.
- Assess options for relocating satellites from other parts of the GEO arc.
- Advice management on interference case handling and relocation options.

QUALIFICATION

Ideal candidates should meet the following criteria:

- Be discreet and results oriented;
- Have 10 years experience in relevant job position;
- Be ready to travel and work in EMEA (Europe, Middle East and Africa)
- Speak-write English fluently.

In addition, advantageous is considered:

- experience in relocation of satellites gained with a satellite operator
- hands on experience with state of the art Interference detection tools.
- Additional languages of EMEA region (French, Arabic, Italian, Russian)

REMUNERATION

Salary after tax in the range 8 to 16 K euros, according to qualifications and experience.
